BSEE Panel

- Jane Herbst, GOMR Director, BSEE
- Mark Festive, PACR Director, BSEE
- Rex, Chief ORP, BSEE

Operations Update

- OOC Staff

NOTICE

OCS OCM I Marine Safety Information Bulletin 20-04

In 2014, the Eighth Coast Guard District implemented a “report by exception” OCS hurricane evacuation reporting policy. This policy will continue for the 2020 Hurricane season.

The Eighth Coast Guard District is requesting that operators of ALL manned facilities and Mobile Offshore Drilling Units (MODUs) report only when personnel, who otherwise intended to evacuate the unit due to approaching heavy weather, were stranded on board AND not able to evacuate due to extreme circumstances; or if a MODU intends to, but is unable to relocate for storm avoidance. Reports of personnel remaining offshore will allow the Eighth

District to prepare for potential post-storm search and rescue operations.

Read the entire MSIB 20-04 [here](#).

NOTICE

America's Offshore Energy Industry

The Economic Impacts of the Gulf of Mexico Oil and Natural Gas Industry

The NOIA-commissioned study, *The Economic Impacts of the Gulf of Mexico Oil and Natural Gas Industry* is now available.

The firm Energy & Industrial Advisory Partners (EIAP) has modeled three scenarios of what the Gulf of Mexico could look like by 2040: a scenario based on a continuation of current policies and regulations; a scenario examining the potential impacts of a ban on new offshore leases; and a scenario examining the potential impacts of a ban on new drilling permits approvals in the Gulf of Mexico.

NOTICE

Alternatives to Lifeboat Launching Guidance

Document Now Available

This Guidance Document will discuss the variety of factors that have combined to form historical practices with lifeboat launching and recovery in the GOM. It will also highlight the unique risks posed by lifeboat operations on offshore facilities in this area. Finally, it will establish a proposed framework based on international standards and best practices well established in other offshore areas that, if accepted by the USCG, can be voluntarily implemented by operators in order to significantly de-risk launching and recovery activities conducted to confirm lifeboat operational readiness and operator competency.

The full document can be found [here](#).

HAPPENING NEXT WEEK

June 8: OOC COVID-19 Workgroup / Regulator Call (GoToMeeting)
